WALL COVER MAINTENANCE AND CLEANING GUIDE

This guide contains the basic information which the customer and/or user needs to know in order to clean a wall cover and achieve greater performance and longer system life.

1. GETTING RID OF SMALL STAINS

Product

Neutral detergent or ammonia.

Instructions of use

1. Dilute a small quantity of the cleaning product in warm water (use just ammonia on stubborn stains).
2. Apply the solution onto the stain and surrounding area (without rubbing) with a well-wrung sponge or cloth.
3. Rinse with water.
4. Dry with synthetic duster.

Note: Consult cleaning product experts for special stains.

2. REGULAR MAINTENANCE OF LARGE SURFACES

The frequency of cleaning depends on the use the installation is subject to. Follow the steps described above, leaving the surface to dry once cleaned without using a duster.
