\* The module without rear can not be placed at the extremity columns.

## T-BOX CABINET

### DESCRIPTION

#### Structure

Single folded structure, sides and back, no visible joints. Sides with double structure in sheet metal. Base welded and top clipped and screwed on the folded structure.

All manufactured with 1 mm sheet metal DC01 under norm UNE-EN 10130.

The whole structure is pre-treated with degreaser, a cleaning process and phosphate followed by a layer of powder coated epoxy paint and finally a polymerisation process. The abovementioned finish meets the present fire safety norm UNE 23827-90

#### Front

Option of sheet metal of 0.8 mm DC01

Option of laminated particle board of 19 mm with medium density laminate.

ABS handle with the option of integrated locking system.

#### Front function

Folding, retractable door - It slides on plastic rails recessed into the sides of the cabinet.

Filing cabinet and two drawers - Anti-tilt system with counterweight. Extractable rails. Equipped with a safety system that prevents both drawers opening simultaneously.

#### Plinth

1.5 mm steel. Fixed and clipped with screws. On levelling glides or castors of 60 mm radius. Option of hard or soft castors for different floors.

Without castors

With castors
